

Solutions with Innovation - Connecticut Manufacturing Site to Stay Operational as an Essential Manufacturer of Critical Safety Devices

March 20th, the State of Connecticut issued an Executive Order directing all non-essential businesses and not-for-profit entities in Connecticut to prohibit all in-person functions, effective Monday, March 23, 2020 at 8:00 p.m. Essential industries and suppliers to those industries are exempt from the order. As such, SWI will continue to fulfill its mission by continuing all global operations. We recognize the obligations that we, as a company, have to our valued customers, channel partners and associates. We have been at the forefront of proactively addressing the challenging environment in which we find ourselves by protecting our associates and the community. This has been achieved through remote work, social distancing, and additional health, safety and environmental safeguards. We continue to monitor the situation but we intend to honor our commitments and we look forward to partnering with our customers and channel partners in these trying times.

Solutions with Innovation, over its 35 year history, has been a global leader in the design, manufacture and supply of essential safety devices for a wide range of critical industries which are necessary for the on-going health and well-being of our nation. These safety devices provide critical and necessary measurement and control that enables the safe operation of industrial plants and facilities in the oil and gas, power, food and beverage, chemical, water and wastewater and pharmaceutical markets. Our mission, as it has always been, is to apply our industry expertise to solve complex level and flow challenges that allow our customers to operate safely, reliably and at optimal efficiency backed by unparalleled service and support.

Best regards,

Matt Kulman
General Manager
