

**SOLUTIONS WITH INNOVATION**

Production throughput; inventory management; and product quality in the food and beverage industry rely heavily on accurate and reliable level instrumentation with the capacity to accommodate dynamic process conditions and prevent upsets that could result in costly waste and disposal due to spillage/overflow.

Solutions with Innovation (SWI) specializes in helping clients maintain a competitive edge in rapidly changing global markets by offering level solutions that meet stringent industry demands while reducing the overall investment in instrumentation technologies.

## Food & Beverage Product Solutions from SWI

- **Single/Multi Point Level Switches**
  - Single/multi-point level float switches available for small or large tanks to include interface applications
  - Custom probe lengths, wide selection of materials of construction and flexible mounting configurations

- **Liquid Level Transmitters**
  - Float level transmitter for continuous output
  - Available in 316 SS, brass, and plastic to accommodate a variety of applications
  - Various mounting configurations available including Tri-Clamp®
  - Optional high and low level alarm features

## • Visual Level Indicators

- Custom center-to-center lengths and flexible process connection options
- High process visibility and safety as compared to traditional sight glass gauges
- Bolt-on options to enhance process control: high/low alarm switches and transmitter
